MYOLA

Management Team - Scott and Sarah Reichelt and Ian Pates form the Management team at the Myola property.

Directions to Myola

To travel to the workshop and Office facilities of Myola, travel 17km's towards Moonie from Dalby on the Moonie Hwy. Take the turn to the right at the signposted 'Kupunn' Road. Follow the Kupunn road, cross the rail line and continue for approx 200m until the sharp bend to the left. The entrance to the farm is located at this point. A gravel driveway leads to a house, sheds and silos. The Myola office is located inside the main workshop facility.

Cropping Programs

Most of the crops will be grown in the summer months rather than in the winter. Summer crops consist of sorghum and cotton and the winter crops include wheat, barley and chickpeas. Myola farms an additional neighboring 640ha lease area as part of its operations.

Infrastructure

Because of the size of the individual farms purchased to make up the Myola property there was very little useful infrastructure, including large sheds and grain storage facilities, especially as all of these farms were located close to storage facilities at Kupunn. Infrastructure redevelopments have been taking place on the block most central to the five farms that comprise Myola. To date, construction of a new workshop and office, weighbridge and purchase of 1,500 tonne silo storage has been completed.
